## Foreword

This bibliography, compiled by community of the Northwest Territories, is meant to be a working tool for researchers and administrators whose duties and responsibilities affect resident populations in Northern Canada. Furthermore, it will certainly be of interest and of use to inhabitants of the North who wish to acquaint themselves with those research activities being conducted with respect to their communities and to use this information in terms of their own expectations and objectives.

So many things have been written about the North that it has become necessary to have a rapid and efficient reference tool at hand. This bibliography's specialty is that it presents the material by *community* and not by the traditional subject or study sectors.

The organizational method was to list research documents related to the history, demography, social, economic, and cultural organization of communities in the Northwest Territories. It should be noted that certain documents do not deal with distinct communities, but rather with regions such as the Mackenzie or Baffin Island regions. Thus, a list of regions is found in the table of contents, as well as a list of communities. Finally, the names of certain communities do not appear in this bibliography, because no pertinent research documents or other significant pieces of literature were found.

Donat Savoie  
Co-ordinator, Eastern Arctic  
Northern Research Division

## Avant-propos

Cette bibliographie par communauté des Territoires du Nord-Ouest se veut un outil de travail pour les chercheurs et administrateurs dont les préoccupations et responsabilités touchent les populations du Nord canadien. De plus, il sera certainement intéressant et utile aux habitants du Nord de connaître les travaux de recherche qui concernent leurs communautés respectives et ce, afin de pouvoir utiliser cette information en fonction de leurs propres attentes et objectifs.

Tant de choses ont été écrites sur le Nord qu'il était devenu nécessaire d'avoir en mains un instrument de référence rapide et efficace. Cette bibliographie dont la particularité est de présenter le matériel par *communauté* et non par thème ou secteur d'étude entend répondre à ce besoin.

Le but premier de ce travail était de colliger les travaux de recherche se rapportant d'abord et avant tout à l'histoire, à la démographie et à l'organisation sociale, économique et culturelle des communautés des Territoires du Nord-Ouest. On notera que certains travaux ont porté non sur des communautés déterminées mais sur des régions incluant plusieurs communautés. La région du Mackenzie ou la région de la Terre de Baffin en sont des exemples. Ainsi, dans la table des matières, à l'instar de la liste des communautés, on trouvera une liste des régions. Enfin, le nom de certaines communautés n'apparaît pas dans cette bibliographie, et ceci s'explique par le fait que nous n'avons trouvé aucun travail de recherche ou document sur ces dites communautés.

Donat Savoie  
Coordonnateur, Arctique de l'Est  
Division de la Recherche nordique
